Section I: Funding Opportunity Description

A) Background
The mission of the Government of the District of Columbia’s Department of Health Care Finance (DHCF) is to improve the health outcomes of District (DC) residents by providing access to comprehensive, cost effective, and quality healthcare services. As the single State Medicaid Agency, DHCF administers the Medicaid program and the State Child Health Insurance Program (CHIP). DHCF also administers the locally-funded Healthcare Alliance Program (Alliance). Through these programs, DHCF provides health care services to children, adults, elderly and persons with disabilities who have low-income. Over 250,000 District residents (more than one-third of all residents) receive health care coverage through DHCF’s Medicaid, CHIP and Alliance programs. DHCF strives to provide access to health care services in the most appropriate and cost-effective settings possible.

The District of Columbia continues to be in the midst of an opioid addiction crisis, including an epidemic of overdose deaths. Every day, healthcare workers are helping people who are struggling with addiction, and caregivers are desperate for tools to help them recover. In order to stem the tide of overdose and mortality, opioid addiction must be treated like other health issues, necessitating new research and the use of evidence-based approaches to care.

In DC, there are several efforts available and underway to counteract the opioid addiction crisis and further help individuals addicted to opioids. Such efforts include the DC Prescription Drug Monitoring Program (PDMP), pilots conducted by District agencies, and collaborations with neighboring states. However, nationwide there is a lack of available information and research-based evidence that has investigated whether genomic factors may place an individual at risk for opioid addiction. Information on genetic factors could be beneficial to providers who treat substance use disorder and aid in optimal and targeted dosing of patients who are on medication-assisted opioid addiction treatment. With efforts to better understand, treat, and reduce the opioid crisis in DC, the scope of work funded by this MAT Genomic Registry grant supports the District’s goal to continuously improve health and health care for District residents.

Program Description
The Department of Health Care Finance (DHCF) announces a Notice of Funding Availability (NOFA) for grant funds under the Fiscal Year 2018 Budget Support Act of 2017, Subtitle C, Section 5032. The Department of Health Care Finance Establishment Act of 2007, effective February 27, 2008 (D.C. Law 17-109; D.C. Official Code 7-771.05(4) (2012 Repl.) directs Medicaid to award a grant to a college of pharmacy located in the District to create and maintain a Medication-Assisted Treatment (MAT) Genomic Registry (hereafter, “MAT Genomic Registry”). Per the aforementioned Act, a MAT Genomic Registry is defined as a central location for the submission of genetic test information health care providers can use to provide medication assisted treatment, clinical decision support for induction, stabilization, and
maintenance treatment, and genomic-guided medication therapy management for opioid addiction.

The goal of the MAT Genomic Registry is to:

1. Provide a centralized web-based database of genomic testing results that can be used by providers who treat substance use disorder and aid in optimal and targeted dosing of patients who are on medication-assisted opioid addiction treatment.
2. Identify possible genetic disorders that may place an individual at risk for opioid addiction.
3. Offer accurate & validated genomic testing results to patients and providers that provides clinical decision support for opioid-related MAT.
4. Assist in better health outcomes and quality of life for individuals, families & communities with addiction.

C) Program Benefits

A MAT Genomic Registry is designed to provide a centralized web-based database for the submission of genetic test information that health care providers can use to provide MAT, clinical decision support for induction, stabilization, and maintenance treatment and genomic-guided medication therapy management for opioid addiction. Furthermore, this registry aims to improve health outcomes by improving the accuracy of genomic testing, investigating genetic factors that may place an individual at risk for opioid addiction, and informing policies to increase capacity and choice of treatment in the District of Columbia.
This grant will support a college of pharmacy in the District to create and maintain a MAT Genomic Registry.

D) Purpose of RFA
The purpose of this RFA is to solicit applications from colleges of pharmacy in the District for selection as a grantee for the MAT Genomic Registry Grant.

E) Available Funding
The total amount of funds available is up to two hundred & fifty thousand dollars ($250,000.00).

Please note, College of Pharmacy respondents to the RFA must be designated as Principal Site with a named Project Director or Principal Investigator (PI) and specified time allocated to this grant. The PI based at the principal site is responsible for establishing and overseeing all implementation, reporting and administration of grant-related activities. The grantee is permitted to sub-grant no more than 50% of the work set forth under this RFA.
