DHCF Transmittal No. 12-32

TO: Medicaid Providers of Institutional Long Term Care Services-Nursing Facilities & Hospitals
Medicaid Beneficiaries Residing in Nursing Facilities & Hospitals

FROM: Linda Elam, PhD, MPH 
Deputy Director, Medicaid

DATE: DEC 10 2012

SUBJECT: Money Follows the Person Demonstration —Selection of Participants for the Elderly & Physically Disabled Home and Community-Based Services Waiver Population

This Transmittal addresses the selection of participants for the Elderly and Physically Disabled (EPD) Home and Community-Based Services (HCBS) Waiver Population of the Money Follows the Person (MFP) Demonstration.

MFP assists selected eligible DC Medicaid beneficiaries who receive institutional long term care services in nursing facilities and hospitals to move back to the community with Medicaid home and community-based supports. It is a federal grant project funded in part by the US Centers for Medicare and Medicaid Services (CMS) as established in the Deficit Reduction Act of 2005, and amended by Section 2403 of the Patient Protection and Affordable Care Act, approved in March 2010.

The purpose of this transmittal is to inform institutional long term care providers and residents in those institutions about how MFP participants in the EPD population will be selected from among eligible DC Medicaid beneficiaries who currently reside in nursing facilities and hospitals. MFP eligibility, screening, and admission into MFP are outlined.

MFP Eligibility

Under the District of Columbia's Money Follows the Person Operational Protocol, a person eligible for MFP:

1. currently resides (and has resided for a period of not less than 90 days) in a Qualified Institution;
2. is receiving federal Medicaid benefits for inpatient services furnished by a Qualified Institution for at least one day before the transition to Medicaid Home and Community-Based Services; and
3. who has been determined to continue to require the level of care provided in a Qualified Institution.

A Qualified Institution for people in the MFP-EPD population is an inpatient long term care facility that is either a hospital or a nursing facility.

Screening for MFP

During outreach activities, MFP Project Team staff will screen interested nursing home residents for MFP eligibility using the DC MFP Screening Tool (Attached).

Outreach activities in nursing facilities include the following:

1. group information sessions for all nursing home residents and/or family members about MFP and options for housing and home and community-based services;
2. individual meetings with nursing home residents and/or family members about MFP and options for housing and home and community-based services;
3. group information sessions for nursing home staff about MFP and options for housing and home and community-based services ;
4. written communications to nursing home staff by email and U.S. mail about MFP and options for housing and home and community-based services; and/or
5. any of the above activities in follow-up to individual level data from Section Q. of the federally established Minimum Data Set (MDS) or direct contacts from individuals and/or their representatives.

Screenings will be administered in all District of Columbia nursing homes that serve DC Medicaid beneficiaries. Screenings will also be administered to DC residents who currently reside in hospitals or out-of-state nursing homes when these individuals and/or their representatives contact MFP Project Team staff or the District of Columbia Office on Aging (DCOA)/Aging and Disability Resource Center (ADRC) and express interest in returning to the community.

To request a screening, contact the District's MDS Section Q Local Contact Agency, the DC Aging and Disability Resource Center at (202) 724-5626.
